

## **FEATURES**

- ► Industrial Standard SIP-7 Package
- Unregulated Output Voltage
- ▶ I/O Isolation 4000VAC with Reinforced Insulation, rated for 300VrmsWorking Voltage
- ▶ Low I/O Leakage Current < 2µA</p>
- ▶ Operating Ambient Temp. Range -40°C to 95°C
- Short Circuit Protection
- ▶ Medical EMC Standard with 4th Edition of EMI EN 55011 and EMS EN 60601-1-2 Approved
- ► Medical Safety with 2xMOPP per 3.2 Edition of IEC/EN 60601-1 & ANSI/AAMI ES60601-1 Approved with CE Marking
- Risk Management Report Acquisition according to ISO 14971

## PRODUCT OVERVIEW

Introducing the MINMAX MAU01M series - an innovative range of 1W medical-approved isolated DC-DC converters encapsulated in a SIP-7 package, meticulously designed for medical applications. With 9 models available, supporting input voltages of 5, 12, and 24VDC, and providing output voltages of 5, 12, and 15VDC, this series ensures versatility to meet various medical device requirements.

The MAU01M series boasts an I/O isolation specified for 4000VAC with reinforced insulation, rated for a reliable 300Vrms working voltage. Additional features include short circuit protection, low I/O leakage current of 2µA max, and an operating ambient temperature range from -40°C to 95°C without derating. Aligning with the 4th edition medical EMC standard, the series holds medical safety approval with 2xMOPP (Means Of Patient Protection) per the 3.2 Edition of IEC/EN 60601-1 & ANSI/AAMI ES 60601-1.

In adherence to ISO 14971 Medical Device Risk Management, the MAU01M series undergoes a comprehensive risk assessment process. This ensures not only compliance with high-performance standards but also alignment with the rigorous safety benchmarks outlined in ISO 14971. By seamlessly integrating the MAU01M series into medical devices, you not only benefit from its compact design and versatile voltage options but also ensure compliance with comprehensive risk management protocols.

In summary, the MAU01M series offers an optimal solution for demanding applications in medical instruments, now fortified with the assurance of ISO 14971 compliance. Elevate your medical devices with the MINMAX MAU01M series - where innovation meets safety, performance, and meticulous Medical Device Risk Management Report Acquisition.

<b>Model Selection</b>	Model Selection Guide

Environmental Specifications			
Parameter	Min.	Max.	Unit
Operating Ambient Temperature Range (See Power Derating Curve)	-40	+95	°C
Case Temperature		+105	°C
Storage Temperature Range	-50	+125	°C
Humidity (non condensing)		95	% rel. H
Lead Temperature (1.5mm from case for 10Sec.)		260	°C

## **Notes**

- 1 Specifications typical at Ta=+25°C, resistive load, nominal input voltage and rated output current unless otherwise noted.
- 2 These power converters require a minimum output loading to maintain specified regulation, operation under no-load conditions will not damage these modules; however they may not meet all specifications listed.
- 3 We recommend to protect the converter by a slow blow fuse in the input supply line.
- 4 Other input and output voltage may be available, please contact MINMAX.
- 5 The external components might be required to meet EMI/EMS standard for some of test items. Please contact MINMAX for the solution in detail.
- 6 Specifications are subject to change without notice.
- The repeated high voltage isolation testing of the converter can degrade isolation capability, to a lesser or greater degree depending on materials, construction, environment and reflow solder process. Any material is susceptible to eventual chemical degradation when subject to very high applied voltages thus implying that the number of tests should be strictly limited. We therefore strongly advise against repeated high voltage isolation testing, but if it is absolutely required, that the voltage be reduced by 20% from specified test voltage. Furthermore, the high voltage isolation capability after reflow solder process should be evaluated as it is applied on system.
